DIGITAL TEACHING FOR DIGITAL LEARNERS

It's all about student achievement at **JFY NETWORKS**. Today's students are the digital generation. To compete for their attention, education has to meet them where they are—online. JFYNet is a structured, blended e-learning program that gives teachers & students the digital tools & professional support they need to maximize learning. Trained Instructional Technology Integration Specialists provide professional development, working with teachers in the classroom to select & adapt curriculum, interpret data, individualize instruction & monitor student progress so that students master the material for which they are accountable, whether MCAS, SAT or ACCUPLACER.

JFYNet offers complete digital middle & high school math curricula, an online middle school science curriculum and a high school biology curriculum. MCAS results over the past ten years show that students in JFYNet programs consistently score higher than their peers—in all demographic groups. JFYNet works from the ground up, classroom by classroom, to transform the practice of teaching and the experience of learning. It's a scalable, sustainable option for change in our schools. JFYNet was created in 2000 by JFYNetWorks, a Boston-based non-profit education & training agency. Last year, JFYNet reached 5,500 students in 25 Massachusetts schools.
